

Evidencing your hypothesis

This tool is to help you set out the different elements you need to consider when gathering or generating evidence to support your hypothesis.

Working hypothesis

What is the current hypothesis that you are planning to test?

Purpose

Describe the purpose of the evidence, what will it help you to achieve? I.e. challenge biases, demonstrate impact, leverage agency...

Audience

Who will you present this evidence to and why? What will they do with it? What might it enable them to do?

Gather and generate

How might you go about gathering or generating this evidence, what tools or methods do you think you'll employ?

Time and resource

What is your time scale for achieving this? What resources do you anticipate needing?

Challenges

What problems or challenges do you anticipate encountering? What support might you need and where could you find this?
